

Debt Payoff Planner

Thank you! Three minutes to your debt-free date.

Open it

Google Sheets: drive.google.com → *New* › *File upload* → choose **Debt-Payoff-Planner.xlsx** → open it → *File* › *Save as Google Sheets*. **Excel:** double-click the file (click "Enable editing" if asked).

Set it up (Debts tab)

1. One line per debt: current balance, yearly interest rate (%), minimum monthly payment.
2. The extra amount you can add every month, on top of the minimums. Even a small amount changes the date.
3. The month of your first payment.
4. Choose **Avalanche** (least interest) or **Snowball** (quick wins).

Every month

The Dashboard tells you one thing to do: pay the minimum on every debt, and the rest on your **focus debt**. When a debt is paid off, its minimum rolls over to the next one automatically. Update the balances from your statements once a month and the plan recalculates.

A planning tool, not financial advice: real interest can be charged differently by each lender. Designed with the help of AI tools.
