

ADHD-Friendly Budget Spreadsheet

Thanks for your order. Setting it up takes about five minutes.

Opening the file

Google Sheets: go to drive.google.com, click *New > File upload* and pick **ADHD-Friendly-Budget.xlsx**. Open it, then choose *File > Save as Google Sheets*.

Excel: double-click **ADHD-Friendly-Budget.xlsx**. If Excel shows a yellow "Enable editing" bar, click it.

Setting it up

1. **Budget** tab: your monthly amount per category, and how much you want to save.
2. **Bills** tab: each bill once, with the day of the month it is due.
3. **Log** tab: one line each time you spend or get paid.

You only type in the **yellow cells**. Delete the example lines when you are ready. Select the yellow cells and press Delete, rather than deleting whole rows.

Each day

Open the **Dashboard**. The big number is what you can spend per day for the rest of the month. If you want to buy something you had not planned, put it on the **Impulse List** and decide 48 hours later.

Each month

Pick the new month on the Dashboard, and set every bill back to **No** in the *Paid?* column.
