

Chores and Allowance Tracker

Thanks for your order. Setting it up takes about ten minutes. After that, a tick for each chore done and a line on pay day keep it up to date.

Opening the file

Google Sheets: go to drive.google.com, click *New > File upload* and pick **Chores-Allowance-Tracker.xlsx**. Open it, then choose *File > Save as Google Sheets*. With the Google Sheets app you can tick the chores from your phone.

Excel: double-click the file.

Setting it up

1. **Kids:** each child with a base amount a week, so much a point, and the shares to save and to give. The rest goes to Spend. Add a goal and its price if they are saving for something.
2. **Chores:** each chore for each child, its points, and an x on the days it is expected.
3. Delete the example family on Kids, Chores, This week and Money: they are made up. Select the yellow cells and press Delete, rather than deleting whole rows.

Each week

- **This week:** an x in the box when a chore is done. The shaded boxes are the days it is expected.
- **Fridge chart:** pick a child in the yellow box and print. Print one for each child. It shows the days to do each chore and the ticks made so far.
- **Pay day:** the Dashboard shows what each child earned: the base amount plus the points times the rate. Add it on Money as Pocket money, jar Split.
- **A new week:** clear the boxes on This week. The money stays on Money. To see or print another week, type any day of it on Settings.

The jars

- **Split** shares the amount by the child's own shares, for example 40% to Save, 10% to Give and 50% to Spend.
- Name one jar when the whole amount goes there: a birthday gift to Save, or a treat bought from Spend.
- **Weeks to go** is how long until the goal at the rate the child saved over the last four weeks.
- A jar below zero shows in red, and so do shares that add up to more than 100%.

Room for 6 children, 40 chores and 500 money lines.
