

Freelancer Income & Tax Tracker

Thanks for your order. Setting it up takes about five minutes. After that you add one line per invoice or expense.

Opening the file

Google Sheets: go to drive.google.com, click *New > File upload* and pick **Freelancer-Tax-Tracker.xlsx**. Open it, then choose *File > Save as Google Sheets*.

Excel: double-click the file.

Setting it up

1. **Settings:** the year, and the share of your profit you put aside for tax. Ask your accountant for your rate. Many freelancers put aside 25 to 30% to be safe.
2. **Income:** one line per invoice. Fill in *Paid on* when the money arrives. An invoice turns red when it is overdue.
3. **Expenses:** one line per business purchase. Choose *Yes* under *Receipt?* once you have the receipt.
4. **Tax Savings:** add a line each time you move money aside for tax.
5. The example invoices, expenses and savings are made up. Select the yellow cells and press Delete, rather than deleting whole rows.

Once a week

Open the Dashboard. **Still to put aside** is the amount to move to your tax savings now. The Heads-up box lists overdue invoices and expenses without a receipt.

This file tracks numbers and does not give tax advice; rules differ by country. Made with the help of AI tools.
