

Moving Planner

Thanks for your order. Setting it up takes about ten minutes, and then it keeps the tasks, the boxes and the money in one place until you are settled in.

Opening the file

Google Sheets: go to drive.google.com, click *New > File upload* and pick **Moving-Planner.xlsx**. Open it, then choose *File > Save as Google Sheets*. Share it with whoever moves with you, and with the Google Sheets app you can tick off boxes from your phone.

Excel: double-click the file.

Setting it up

1. **Dashboard:** moving day, the new home and your budget.
2. **Settings:** the rooms of the home you are leaving.
3. **Tasks:** a checklist is ready, from 8 weeks before to 3 weeks after. Change the days before, add your own tasks or delete the ones you do not need. Every date is counted back from moving day.
4. The example move is made up: delete its boxes, costs, quotes and names. Select the yellow cells and press Delete, rather than deleting whole rows.

Until moving day

- **Boxes:** write a number on each box and one line here, with the room it leaves, the room it goes to and what is inside. Mark it fragile or open first. Put an x under Packed, then under Arrived. The Dashboard gives the next free number.
- **Movers:** the quotes side by side. The cheapest price shows in green.
- **Costs:** what you book, the final price when you know it, what you paid and when the rest is due.
- **New address:** put an x under Done as you tell each one. On moving day, note the meter readings.
