

Wedding Budget Planner

Congratulations, and thanks for your order. Setting it up takes about ten minutes.

Opening the file

Google Sheets is the easiest way to plan together: go to drive.google.com, click *New > File upload* and pick **Wedding-Budget-Planner.xlsx**. Open it, choose *File > Save as Google Sheets*, then use *Share* to invite your partner.

Excel: double-click the file.

Setting it up

1. **Dashboard:** type your wedding date.
2. **Budget:** type your total budget. The percentages are a common starting point. Change them to match your priorities; together they must make 100.
3. **Vendors:** add each vendor once you have a quote, with what you have paid and when the next payment is due.
4. **Guests:** one line per guest. Update the RSVP and meal as answers come in.

You only type in the **yellow cells**. Delete the example vendors and guests before you start. Select the yellow cells and press Delete, rather than deleting whole rows.

Once a week

Look at the Heads-up box on the Dashboard. It lists overdue payments, payments due in the next 14 days and guests who have not answered.
