

Wedding Budget Planner

Congratulations, and thank you! Ten minutes to set it up.

Open it

Google Sheets (best for planning together): drive.google.com → *New* › *File upload* → **Wedding-Budget-Planner.xlsx** → open it → *File* › *Save as Google Sheets* → *Share* with your partner. **Excel**: double-click the file.

Set it up

1. **Dashboard**: your wedding date.
2. **Budget**: your total budget. The shares are a common starting point; change them to match your priorities (they must add up to 100).
3. **Vendors**: add each vendor once you have a quote, with what you paid and when the next payment is due.
4. **Guests**: one line per guest; update RSVP and meal as answers come in.

Only type in the **yellow cells**. Delete the example vendors and guests.

Every week

Check the Heads-up box: overdue payments, payments due in the next 14 days, guests who have not answered.
