

Freelancer Income & Tax Tracker

Thank you! Five minutes to set it up, then one line per invoice or expense.

Open it

Google Sheets: drive.google.com → *New › File upload* → **Freelancer-Tax-Tracker.xlsx** → open it → *File › Save as Google Sheets*. **Excel:** double-click the file.

Set it up

1. **Settings:** the year, and the share of profit you put aside for tax. Ask your accountant for your rate; 25-30% is a common cautious choice.
2. **Income:** one line per invoice. Fill *Paid on* when the money arrives. Invoices turn red when overdue.
3. **Expenses:** one line per business purchase. Tick *Receipt?* once you have it.
4. **Tax Savings:** add a line each time you move money aside for tax.

Every week (2 minutes)

Open the Dashboard: **Still to put aside** tells you what to move to your tax savings now. The Heads-up box lists overdue invoices and missing receipts.

A tracking tool, not tax advice: rules differ by country. Designed with the help of AI tools.
