

ADHD-Friendly Budget Spreadsheet

Thank you! Here is how to start in 5 minutes.

Open it

Google Sheets: go to drive.google.com, click *New > File upload*, choose **ADHD-Friendly-Budget.xlsx**, then open it and click *File > Save as Google Sheets*.

Excel: double-click **ADHD-Friendly-Budget.xlsx**. If Excel shows a yellow "Enable editing" bar, click it.

Set it up

1. **Budget** tab: your monthly amount per category, and how much you want to save.
2. **Bills** tab: each bill once, with the day of the month it is due.
3. **Log** tab: one line each time you spend or get paid.

Only type in the **yellow cells**. Delete the example lines when you are ready.

Every day (10 seconds)

Open the **Dashboard**: the big number is what you can safely spend per day for the rest of the month. Something tempting? Put it on the **Impulse List** and decide in 48 hours.

Every month

Pick the new month on the Dashboard, and set every bill back to **FALSE** in the *Paid?* column.
