

Inventory & Sales Tracker

Thank you! Ten minutes to set it up, then one line each time stock changes.

Open it

Google Sheets: drive.google.com → *New › File upload* → **Inventory-Sales-Tracker.xlsx** → open it → *File › Save as Google Sheets*. **Excel:** double-click the file.

Set it up

1. **Products:** one line per product: a short SKU code, name, category, unit cost, price, stock today, and the level at which you want to reorder.
2. **Stock Moves:** from now on, one line each time stock changes: *Purchase* (you bought or made stock), *Sale*, *Return*, or *Adjustment* (negative number for broken, lost or gifted items).

Every week

Open the Dashboard: **To reorder now** counts products at or below their reorder level; the Products tab shows which ones in orange (red when sold out). Pick a month to see its sales, units and gross profit.
