

Teacher Planner and Gradebook

Thanks for your order. Setting it up takes about twenty minutes: your classes, your timetable and your students. After that, a line for each lesson and your marks as they come in.

Opening the file

Google Sheets: at drive.google.com, click *New > File upload*, pick **Teacher-Planner-Gradebook.xlsx**, open it and choose *File > Save as Google Sheets*. **Excel:** double-click the file.

Setting it up

1. **Settings:** your class names (up to six), the pass mark and your grade scale.
2. **Timetable:** the class in each period of your usual week, with the start times.
3. **Class 1 to Class 6:** the students of each class, one on each line.
4. Delete the example classes, students, lessons and absences: they are made up.

As the weeks go by

- **Lessons:** the date, the period and the topic. The class comes from the timetable. Add the aims and the homework, and an x when it is done.
- **Week:** the plan for the week, ready to print. For another week, type any day of it on Settings.
- **Class tabs:** each assessment with its date, marks out of and weight, then the scores. M for missing work (counts as 0), Ex for excused, empty for not marked yet.
- **Absences:** only the students who were absent or late.

Good to know

- A test with weight 2 counts twice as much as homework with weight 1.
- Each grade on your scale applies from its percent up to the next one.
- A score above the marks out of shows in red, and so does a name on Absences that is not on the class list.
- Room for 6 classes of 40 students with 20 assessments each, 500 lessons and 400 absences.
